

**A** S UNITARIAN UNIVERSALIST MINISTERS AND SEMINARIANS faithful to conscience and committed to building a more compassionate world, we call upon our colleagues and congregations to join us in striving for more environmentally responsible, humane and healthy diets. We're on a path... and invite you to join us. We've learned that factory farms not only damage American communities and devastate ecosystems with their profligate pollution, but also subject billions of sentient creatures to tremendous suffering.

**W**E'VE LEARNED THAT MOVING TOWARD PLANT BASED diets does more to slow global warming than replacing SUVs with compact hybrids. We're beginning to understand the power of our own plates. Recognizing the moral claims of justice, our obligation to future generations, and the oneness of all life, we invite you to join us: vegetarians and vegans for whom conscious food choices have become some of our most important spiritual practices.
